

Program Login

To start AuditDesktop, click the program icon on your desktop and open the **Login** window.

Program login is performed through several easy steps:

1. Select the database that you wish to work with.
2. Enter your username and password.
3. Click the **Login** button.

You can also login without username and password, but by using your operating system credentials. Regime shift is performed through the following buttons:

-  **Firebird user**
-  **Windows/Active Directory user**

You can find more information on how to add different [user account types](#) for a given user when you give access rights to [employees](#). Information on how to activate different server regimes is available in the [server installation](#) section.

To edit the list of [databases](#), click the  button. To [manage offline databases](#), click the  button.

If you encounter any problems when starting the program, [contact us](#) or click the  button to open the [remote support module](#).
