

System Requirements

The processor, memory, and disk space requirements for the correct functioning of the program depend on the following:

- the number of system users, as well as the number of concurrent users
- the number of documents that will be added, the number of audits, the size of attached files
- other settings, the amount of imported reports, etc.

For more detailed requirements, you can [contact](#) us and give us more specific parameters.

To be installed, the program has the following requirements:

1. Stand-Alone Installation

- Free disk space: 200-600 MB (depending on the type of installation - Independent financial audit, Internal audit, Financial Management and Control System FMCS)
- OS: Windows 7 or newer version, or Windows Server 2008 R2 or newer version
- MS Office 2007 or newer service pack
- .NET Framework 4.5

2. Network Installation

Server

- OS:
 - Windows XP or newer version, or Windows Server 2003 or newer version
 - Linux - minimal kernel version 2.6.27, glibc 2.7 or higher
 - Mac OS X 10.7 or later
- Disk space: 100-400 MB (only for installation; normal work will require additional space, depending on the volume of information that will be used)

Client Instance

- Free disk space: 200 MB
- Windows 7 or newer version, or Windows Server 2008 R2 or newer version
- MS Office 2007 or newer service pack
- .NET Framework 4.5
