

Register the Product

When you first launch the program, you will be asked to activate the workstation. Until you complete the activation process, the program functions will remain unavailable.

There are two ways to perform the activation:

- Click the **Activate now** link located on the main screen
- Open the **Application menu** → Click **Registration**

Select your registration type and click **Next**.

Note

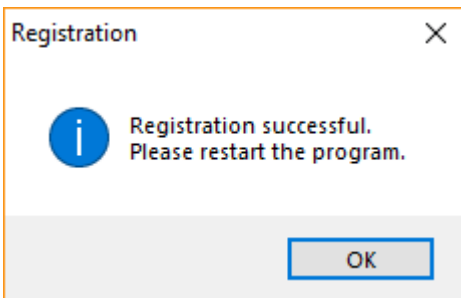

In case you have exceeded your registration limit, the program will display an error message. Please contact our representative for further assistance.

Internet registration

This option is recommended when you have Internet connection. To fully complete the registration process, click **OK** and restart the program.

Registration with activation key

Recommended when there is no Internet connection. A user's key is generated - you can dictate it to our representative over the telephone, or send it by via email using the **Send** button.

Once you receive your activation key from our representative, enter it in the **Activation key** field. Click **Registration**.
